
Job Description - Teacher, Mathematics

UNICMINDS

UnicMinds is a platform to teach kids online via 1:1 live classes. UnicMinds strives to make Mathematics an applicative skill set and a tool to visualize and appreciate mathematics in every technology that a child consumes in today's world.

Teachers play the most crucial role in the overall learning & development experience of kids and in upholding the overall customer experience across the full life-cycle of curriculum development, trial-classes, course classes and doubt-clarifications to children.

At UnicMinds, child-first thinking is very important because aside from teaching them coding, we believe we should look at children in a 360 degree view as today's children are the future of countries, families, companies, and the future quality of life.

This role is required to teach Mathematics to children K-12 in multiple syllabi such as Cambridge, IB, CBSE, IGCSE and others, if required.

Core Responsibilities:

- Take trial classes for Mathematics and convert the prospects
- Internalize, improve and adapt the curriculum according to student's requirement
- Meet all the class requirements in terms of attendance, time discipline and delivery
- Should be able to come up with ideas to enhance the child's understanding of coding concept
- Be adept at understanding the interests of the child and customize the delivery accordingly
- Prepare worksheets and homework questions for the child
- Engage the children in the most productive way for the child

Minimum Requirements:

- Bachelor or Master's Degree
- Should have minimum of 3-5 years of experience in teaching Math to children
- Thinking child first at all costs
